

COMSATS University Islamabad (CUI), Lahore Campus

Department of Computer Science

Lab Assignment # 1

WEB DEVELOPMENT

Submitted To:

Anber Tabassum

FA24-BCS-125

Semester V

Section B

Submitted To:

Usman Akram

STATEMENT

Difficulty: Foundational · Covers: Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · Folder: assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- **A header with your name, a short professional tagline, and a photo (a placeholder image is fine).**
- **An "About Me" section.**
- **An "Education" section listing your academic history in a semantic list or table.**
- **A "Skills" section.**
- **A "Contact" section with a real <a href="mailto:..."> link and at least one social/portfolio link.**
- **Correct use of semantic HTML5 elements throughout — <header>, <nav>, <main>, <section>, <article>, <footer> as appropriate, not a page built entirely out of unstyled s.**
- **Styling entirely in a separate styles.css file (external stylesheet, not inline style="" attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.**

CODE

Index.html

```
<!DOCTYPE html>

<html lang="en">

<head>
